Comment: :

All would be an improvement!

Don't make the swales too deep! (all 3 checked)

Please take care of the drainage issues at the roundabout.

All seem about the same. (all 3 checked)

Cell: B11

Comment: :

Put sidewalk on west side. Can we keep our big boulder by the tree? (Older pedestrians sit on it.)

Sidewalk should be on 1 side of street only.

(marked) Cause I am younger.

Cell: D11

Comment: :

Like sidewalk on east side if I had some parking.

I like the path mainly on one side- I prefer path seperated from roadway.

Please keep it separate from the road.

Please use this form to comment on the concepts presented this evening. Thank you!

No sidewalk in front of my house.

Makes most sense to have continuous sidewalk (all on one side.)

Cell: D12

Comment: :

Perhaps some P-Patches along the corridor- some 4'x10' planter boxes.

Yes- as they fight for a parking space!

Cell: B13

Comment: :

I like the way the street remains "straight" (looks cleaner.)

Need to keep parking.

Cell: C13

Comment: :

I think either of these would help slow traffic (concepts 2 & 3).

Cell: D13

Comment: :

I think either of these would help slow traffic (concepts 2 & 3).

Make the traffic circle work. It's currently not restrictive enough to slow vehicles properly.

If traffic circles are used they should actually work.

Cell: E13

Comment: :

(All 3 checked) Make sure traffic circles are in the middle of the intersection.

Cell: B14

Comment: :

I like the way the street remains "straight"- looks cleaner.

(Comment given 2x's-) Do not block garage and driveway/carport.

Cell: D14

Please use this form to comment on the concepts presented this evening. Thank you!

Comment: :

Like the look.

I think any would be an improvement but like the meandering best.

Should be small town residential look. Bollard pedestrian lighting. No curbs.

Cell: B15

Comment: :

Parking entry at our house needs to be shifted (entire iron fence opens for parking.)

(Both #1 & 2 checked with note-) But don't like alternating sidewalk so (arrow pointing to #2).

Yes, target 30 spaces.

Cell: C15

Comment: :

Maybe on both sides nice to have at least one per house.

I think more parking is needed but not as much as #1.

(Concept 1 and 2 checked with note:)

Cell: D15

Comment: :

You must get feedback from every resident. Send flyers to residents who don't attend meetings.

Need parking in front of house with children.

(Not checked) Can be way better within this design option.

Cell: B16

Comment: :

On concept 1, I'm concerned about our dump trucks not being able to get around the traffic circle (no overall favorite checked- "?" in margin).

Cell: D16

Comment: :

Add more parking.

I really like the meander walk "through the wood" feel.

Please use this form to comment on the concepts presented this evening. Thank you!

Cell: E16

Comment: :

(General comment- no boxes marked in whole sheet except first item.) No real preference. Here as an observer from SE Subarea plan citizens advisory committee.

(None selected) Need modulation of the 3.

Please use this form to comment on the concepts presented this evening. Thank you!
